

WEBSITE

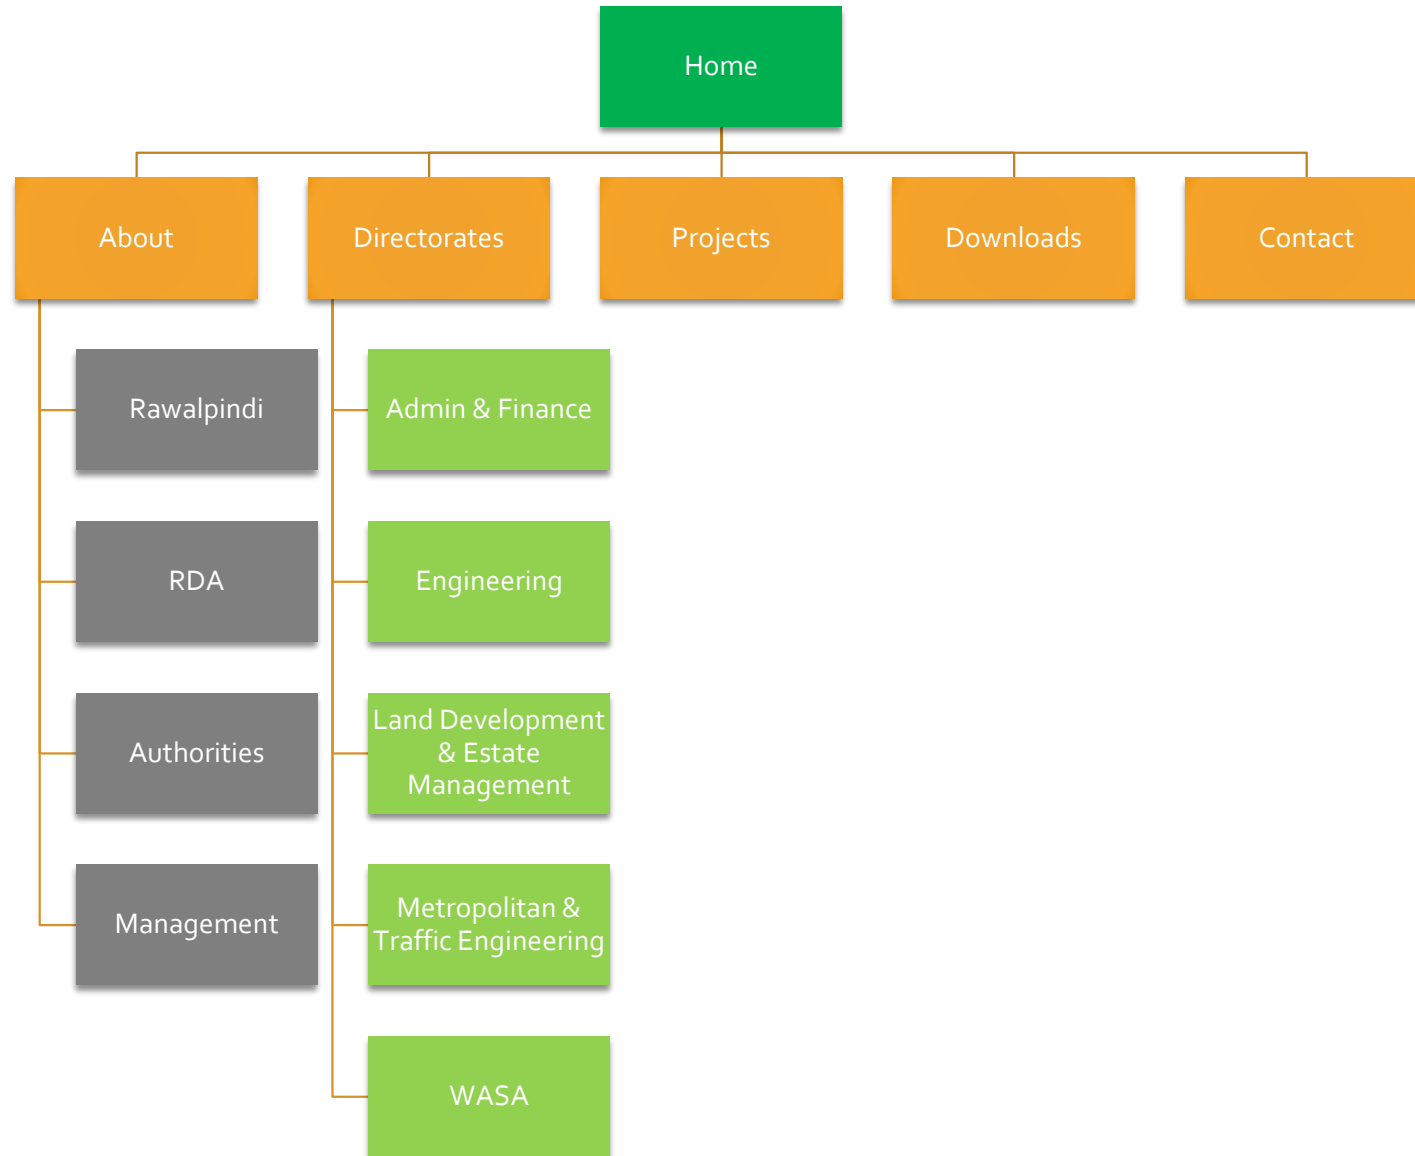

REVAMP

What's New and Why We Need it

Issues with Current Website

- Old fashioned layout which is no more customary.
- Look gets disturbed on Mobile Devices while most of audience is using mobile.
- Updating is too technical for a person who's not tech savvy.
- Not synced or linked with cross platforms.
- Technical points are not entertained like Image to Text Ratio, Text to Code Ratio, Load Time, AMP Technology, On-Page Optimization and various others.

New Proposed
Sitemap

What's New

- Modern Responsive Design.
- Special Layout for Every Screen Size.
- Designated Officials can update website without technical knowledge.
- It will be linked and synced with mobile app and other platforms.
- About 120+ Technical Points will be met while developing this new website so it may load quickly, be safer to browse and appear better to users.
